SUBJECT: Surface water sampling plan Alleghany Co. LF

- I overlooked the small Tributary in the southwest corner prior to our telephone conversation today. An upstream (US) sample needs to be collected at this location also to adequately monitor constituents that are naturally occurring in the surface water at the site.

- As we discussed, please place a permanent location marker at the surface water sampling locations and label the monitoring wells with their appropriate numbers.

Thank you for your help.

√

10/3/94

- Called Mr. McMillan
- Wells were sampled
- Will be sampled again
- Will send a copy of the data.

L.

Jeff Wyatt - out 9/30/94

Geo Science & Technology does not have any record of a sampling episode in 1994 @ Allegheny Co LF.

LR

- Evaluate again after VOC (App I.) scan has been performed in June (94)
- SW data will be submitted then too (1st time).

9/30/94
1:35

- Called Mr Dan McMillan
- out of office
- Receptionist pulled file
- No evidence wells were monitored
