Re: UST removal Piedmont Triad Airport Authority
Guilford County

Dear Mr. Salley;

Piedmont Environmental Services was contracted to remove eight UST's and one hydraulic lift by the Piedmont Triad Airport Authority. We performed this work through Southern Mapping and Engineering Company.

The tanks were pumped and purged of oxygen using dry ice before their removal. Five 3000 gallon gas tanks, one 550 gallon fuel oil tank, one 550 gallon kerosene tank, one 550 gallon waste oil tank, and one hydraulic lift were removed. Soil samples were taken under the excavated tanks as required and the results of those samples are attached. A site map is also attached.

According to the Guilford Laboratories report all the samples tested below the regulatory level except sample 4948 which was taken below the waste oil tank. Based on my phone conversation with you on November 27, we have taken another sample in this hole. This sample is now at Guilford Laboratories to run a RCRA metals and a PCB test. We will submit this report to you as soon as we get it back from the lab.

We have backfilled all the holes except the waste oil pit and we plan to close it soon. If we can help you with any other information please let me know.

Sincerely,

Thad Chesson
