RE: Extension of Demonstration of Liquids Evaporation System
Red Rock Disposal, LLC - Permit No. 9228-CDLF-2001
Holly Springs, North Carolina

Dear Elizabeth:

As you are aware, the Red Rock Construction and Demolition (C&D) facility located in Holly Springs has been performing an evaluation of a liquids evaporation system for the site. The system includes four (4) sumps and 10 Typhoon spray heads as described in previous correspondence.

As we discussed today, we request an additional three-month extension period for this demonstration. The extension is needed due to rainfall this spring and equipment issues which have delayed our efforts.

For the continuation of this demonstration, evaporation events will be performed only on days with no rainfall and will be recorded on the Evaporation Monthly Reporting Form as originally approved. S+G will submit a report summarizing our findings at the end of this demonstration period. If you have any questions or require additional information, please contact us at (919) 828-0577 or by email below.

Sincerely,
SMITH GARDNER, INC.
