Mr. Christopher Cox
Hanesbrands Inc.
1000 East Hanes Mill Road
Winston Salem, NC 27105

SUBJECT: Review of May 2014 Soil Vapor Assessment Report
Former Hanesbrands Industrial Facility
700 South Stratford Road, Winston Salem, Forsyth County, NC
Site ID: NONCD0002945

Dear Mr. Cox:

As the result of a review of the subject report, you were required to conduct additional vapor intrusion evaluation at the adjacent properties in a letter sent you on June 5, 2014. However, an error was noted in the risk calculation by Laura Power: the attenuation factor of 10, instead of 30, was used. When the correct attenuation factor is used, the sample SVP-6 does not contain contaminant exceeds soil gas screening level. Therefore, further vapor intrusion evaluation is not required at this time. We regret that this error may have caused you any inconvenience.

However, you are still required to conduct a receptor survey as indicated in the NORR letters sent to you by the Branch on July 29, 2013 and October 9, 2013. Please submit the result of the receptor survey to the Branch within sixty (60) days from the receipt date of this letter.

Please do not hesitate to contact me if you have any questions about this letter or the actions required.

Sincerely.

Qu Qi, PG, Central Region Unit Supervisor
Division of Waste Management, NCDENR
