ReUse - Proposal to Terry Dover Nov 11, 1991
~25 acres near Hwy 301 at Swift Creek near Battleboro NC
Agreement 11-11-91

1 Prevent Dusting
2 Compaction
3 All coal ash structural fill in the development area will be capped w/ a minimum of 6 inches of earth cover
4 Slopes will receive 12" minimum compacted earth & 6" topsoil
5. Soil erosion & sediment control plan
* 6 Approval for coal ash fill shall become voidable unless the facility is constructed in accordance w/ the approved plans, specifications, & supporting data.
7 Approval is subject to the nature & volume of ash materials discussed & other supporting data.
8 The facility shall be properly maintained & operated at all times.
9. not Transferable
* 10. In the event that the facility fails to perform satisfactorily, including the creation of nuisance & conditions, ReUse Technology shall take such immediate corrective action as may be required by the SWS including the construction of additional or replacement wastewater Treatment or ~~disp.~~ disposal facilities.
* 11. Approval may be rescinded unless the reuse program will protect the assigned water quality & groundwater quality standards.
* 13. The facility shall be effectively maintained & operated as a non-discharge system to prevent the discharge of any wastewater resulting from the operation of the facility
* 14 The issuance of this approval shall not relieve ReUse Technology of the responsibility for damages to surface water or groundwater resulting from

the operation of this facility.

16 No ash will be placed w/in 100' of any water supply well.

*17. No ash shall be placed w/in one foot of the mean seasonal high water table.

*19. The following buffers shall be maintained

b. 50 feet between any application area & any stream, creek, lake, pond or other surface water body.

Dec 3, 1991 letter from Section "appears to meet the guidelines previously agreed to for such reuse."

"not exempt the activity from other ... regulations"
