MEMO.

DATE: 4-28-86

TO: Vennyer

SUBJECT: B & I
initial visit.

This may be a site we can just tabulate. You need to call MR. Fortune for directions, And to set up A specific time for your visit. It is currently tentatively scheduled for late Wed. afternoon (4-30-86). He is keeping the excavation around the lines open for us to observe.

Do A PIRF. Make sure you look at the soil beneath the fill pipe - any migration Away from leak that would have occurred along the pipe - possible Affected WATER supply? (can you get depth to GW measurement in A well?)

At A minimum we will need A NOV from our office and A report in response stating what was done by them.
