Subject: Avery County MSW LFG Monitoirng Plan Revision
Date: Friday, April 15, 2011 10:15:42 AM

Jackie -

Your letter of February 10, 2011 wherein you approved RSG's plan for the mitigation of LFG at the closed Avery County MSW landfill, stated that a revised LFG monitoring plan should be submitted within 60 days. This e-mail is sent to summarize our conversation this morning regarding revision of the LFG monitoring plan. Currently the off-site property owners are reviewing the proposed LFG monitoring well locations on their properties. Once we have final locations that everyone has approved (Unimin, the Airport Authority, Avery County and DENR), we will revise the LFG monitoring plan. Therefore, this plan will not be submitted within the 60 day timeframe outlined in your letter, but will be completed once we have concurrence on the proposed well locations from all involved parties.

Please let me know if you have any questions or require further information regarding the revision of the LFG monitoring plan.

Thanks!
