Project: ARA/Smiths

Location: 6301 Burnt Poplar Rd.

Conversation with: Van Burbach

Telephone: 282-9035

Company or Firm: Pyramid Environmental

Discussion: Conditional CSA acceptance required chloroform contamination be further addressed. MW-5 was only well that showed significant chloroform contamination (38 ppb). Sewer line was damaged during installation of this well & well was taken out when sewer line was repaired. Sewer line identified by Pyramid as possible source of $CHCl_3$. Two other wells showed small concentrations (<1 ppb) in only 1 sampling event.
