Re: Assessment of Corrective Measures
Halifax County Landfill
Construction and Demolition Landfill Permit 42-01
Doc ID 3752

Dear Mr. Garriss:

The Solid Waste Section (SWS) has reviewed and approved the report for Assessment of Corrective Action for the *Halifax County Landfill*, dated December 2007, which described a variety of corrective measures addressing groundwater contamination described in the report. The report had been prepared and submitted by Richardson Smith Gardner and Associates, Inc. Although remedies for the contamination are already recommended in the report, the SWS Rules specify a public meeting with affected and interested parties to whom the options of assessed corrective measures are presented. Requirements of the public meeting are specified in SWS Rule 15A NCAC 13B .1635 (d).

After the public meeting, the county shall then select a remedy(ies) for the reported contamination. The remedy(ies) shall meet requirements listed in SWS Rules 15A NCAC 13B .1635 and .1636. The remedy(ies) shall also meet the Division of Water Quality (DWQ) Rules listed in 15A NCAC 2L, entitled "Classifications and Water Quality Standard Applicable to the Groundwaters of North Carolina." After the SWS approves the selected remedy(ies), the selected remedy(ies) and contingency(ies) plan shall be submitted in a Corrective Action Plan (CAP). The CAP shall be reviewed by the SWS and, when approved by the SWS, implemented in accordance with 15A NCAC 13B .1637.

If you have any questions, I can be reached at 919-508-8525.

Sincerely,

Zinith Barbee
