Project: Lucks

County: Randolph

Conversation with: Darius Lucks

Telephone: ____/____/____

Affiliation: ____

Discussion: Lucks feels that there was no contamination in the ground. The tanks looked good and there was no staining evident. They feel the high levels of O+G were naturally occurring, however background was less than in pit. Also question whether tanks were regulated or not + whether they were ever required to report at all.

- They want to put above ground tanks back over this area and wanted to close out. We can't meet the levels reported. They will probably put in a MW + sample.
- What happens if GW contamination from other sources?
- They must address where it came from.
- They wondered if they put in above ground tank + if GW problems would they have to tank. Should be able to install remediation system w/o moving tank.
- Also have another UST to remove.
