Date: Thursday, August 26, 2010 4:10:00 PM

Weeks Sandpit #2 LCID Landfill
Permit #43F
DIN 11470

Hi Chuck,

Thanks for meeting Drew and me at the Weeks Sandpit #2 LCID Landfill today.

As discussed during the meeting, the remaining check list items needed before operations may commence at the landfill are as follows:

1. Engineer certification that the facility was constructed in accordance with permit and application including the placement of waste boundary markers for Cell 7 [the existing 2-acre notification],
2. The engineer certification should include an explanation that Cell 7 is the existing 2-acre notification site that is to be completed and closed during the initial phase of operation of Cell 1,
3. Written verification of Land Quality approval, and
4. Approval of sedimentation and erosion control measures.

Please let me know of any questions or comments regarding the above comments. Thanks again for your assistance.

Geof
