Subject: Former Seaboard Chemical Corporation Site and
City of High Point Riverdale Drive Landfill
Extension for Remedial System Construction Schedule
NCD 071 574 164

Dear Mr. LaRue and Mr. Babb:

The North Carolina Division of Waste Management (DWM) has received and reviewed your request of construction and testing schedule extension for the remedial system located at the subject facilities, on the behalf of the Seaboard Group II and the City of High Point. Considering the justification you provided in the Technical Memorandum E-7 and Quarterly Remedial Action Construction Progress Reports (1st and 2nd Quarters, 2013) , we agree that the system full operation start date be extended to December 31, 2013.

We agree that a new metal removal unit has to be added to the remedial system since the iron concentration is high enough to cause fouling of the pipes and the treatment system. Please submit a letter report describe the system and design as constructed for our records. The report should also include a description of the waste disposal process for the waste generated from the unit, including waste evaluation and final disposal.

If you have any questions about this letter, please do not hesitate to contact me at 919-707-8213 or qu.qi@ncdenr.gov.

Sincerely,

Qu Qi, PG
