Subject: Buncombe County Landfill MW-3 Gas Migration

Jackie,

Thank you for the time today to discuss the on-going evaluation of the gas migration at the Buncombe County New Landfill. Due to equipment issues and the extreme weather conditions experienced over the last several months we would like to continue with the initial phase of the program for two months. This involves attempting to control migration by adjusting the gas extraction system. This would delay the start of the following milestone periods by the two month extension. If this is acceptable, please let me know.

Thanks

Ed
