You can skip the unimproved parcels if you want, except for the one in Yellow. Looks like a house on the aerial photo at the County's GIS website. Thank you for doing this. Y/N for a tap connection is good enough for our purposes. --George

Teresa,

I haven't spoken to anyone at the City in some time so I'm not sure if Melanie is the still the right person. But do you know who I can contact to find out if a group of address locations have a municipal water connection? Thanks--George

Melainie

I contacted you in 2011 and inquired if a list of addresses loctaion had municipal water service connections. Are you still the Permit Service Coordinator? We are still working in the area of Statesville Boulevard, and it would be extemely useful for us to know which properties are connected When we do mass mailings directly to residents, the response rate is typicall pretty low, and we need this information to investigate reported groundwater contamination.

I can provide the addresses in excel or just pasted them into an email. There are forty nine address locations, and I realize this is a lot to ask. But my Division would be extremely helpful to you or anyone that could help us. Thanks--George
