Re: Monitoring Well Installation (MW-16 through MW-21) Approval
Haywood County Closed Landfill – Francis Farm
Haywood County
Permit No. 44-03
Doc ID No. 15046

Dear Mr. Cotton:

The Solid Waste Section (Section) has reviewed the *Report of Groundwater Assessment: Monitoring Wells MW-6 Through MW-15* (Doc ID #14935) submitted on your behalf by Bunnell-Lammons Engineering, Inc. on August 17, 2011. The Section approves installation of six new monitoring wells, MW-16 through MW-21. The Section understands and approves the tentative schedule of well installation either September and/or October 2011 and sampling of the new wells during the regularly scheduled semi-annual monitoring event in February 2012. However, please note the following stipulations.

1. The newly installed monitoring wells (MW-6, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15) will need to have a baseline sampling event as required under 15A NCAC 13B .1634
2. Submit boring logs and well installation records for the new monitoring wells.
3. Notify the Section when negotiations between Haywood County and the adjacent land owners providing access to their private property are finalized.

Thank you for your efforts and cooperation on this matter. If you have questions or concerns, please contact me via email Elizabeth.werner@ncdenr.gov or phone at (919) 508-8496.

Sincerely,

Elizabeth S. Werner
Hydrogeologist
