PARTICIPANTS:

Ray Williams; DENR-Solid Waste

STATUS OF PERMIT:

Active; Extension Permit to Operate a Solid Waste Pilot Composting Project (Large Type III) issued 21 July 2011; Demonstration Approval expired 4 June 2012. A Permit To Operate (PTO) a solid waste management facility request has been submitted and is pending approval.

PURPOSE OF SITE VISIT:

Comprehensive Facility Compliance Inspection

STATUS OF PAST NOTED VIOLATIONS:

None applicable

OBSERVED VIOLATIONS:

None; please see ADDITIONAL COMMENTS section below.

ADDITIONAL COMMENTS:

- 1) This Facility is a Large Type III Solid Waste Compost Demonstration Project.
- 2) This Facility is permitted to receive for composting, hardwood and softwood sawdust, animal bedding, ground corn cobs, ground and un-ground yard waste, Septage and FOG wastes (dewatered grease trap residuals and Septage), floating fatty solids from animal processing or transportation, clean unfinished wallboard, wood pallets with nails removed, clean untreated wood scrap, pre and post-consumer source controlled food wastes, vegetative agricultural products, tobacco waste, hay and other forage, corn stover, cotton gin trash, peanut hulls, landclearing debris, water treatment lime mud, and non-toxic/no-hazardous coal combustion dust.
- 3) The hours of operation for this Facility are Monday through Saturday 7:00 AM to 7:00 PM.
- 4) This site is secured by a locked cable type gate at the Facility entrance. The gate was closed and locked upon my arrival and no attendant was on site during this Facility Compliance Inspection.
- 5) *Please post proper signage at the entrance to the facility stating the permit number, prohibited materials, and emergency contact information.
- 6) The Facility access road is of all-weather construction and is well maintained at this time.
- 7) Access around the Facility is stable and no areas of erosion were noted during this Facility Compliance Inspection.

- 8) The waste types at the Facility were reviewed and no unpermitted wastes were observed this Facility Compliance Inspection.
- 9) The compost log, documenting observed compost process temperatures and product turning/aeration activities, was in order and reviewed during this Facility Compliance Inspection.
- 10) All Facility operations are being maintained in accordance with the approved plan.
- 11) All liquids are being contained within the concrete bin receiving area.
- 12) Adequate distance is being maintained between and around the windrows for fire suppression and mixing.

- 13) The compost windrows are turned/aerated using a Midwest Bio-Systems Aeromaster PT 130.
- 14) Feedstocks, mixed compost, and finished product are being maintained in separate areas to prevent mixing and/or contamination of finished product as required.

- 15) The final compost product is screened for size before distribution. Fines are distributed as compost while larger, coarse particles are cycled back into the compost process.

- 16) No violations were observed during this Facility Compliance Inspection.
