- 10) Minimal to no leachate is being generated by the compost process at this time.
- 11) All leachate generated by the composting process is collected and recycled within the vermicompost bin system.
- 12) The bedding depth in the vermicompost bins is being maintained at ~12"-14" and the ingredients are layered and processed in accordance with Solid Waste Section recommendations. The composting process appears to be taking place efficiently.
- 13) No offensive odors were noted during this Facility Compliance Inspection.
- 14) The Conditions for Compliance in the Solid Waste Compost Demonstration Permit #SWCD67-01 were reviewed during this Facility Compliance Site Inspection; all conditions are being maintained as per the demonstration permit.
- 15) Compost generated at this facility has been tested in accordance with 15A NCAC 13B Section .1407 of the State Solid Waste Management Rules and has been approved by the Solid Waste Section for distribution to the public.
- 16) The compost product was reviewed during this Facility Compliance Inspection. No uncomposted vegetative material or man-made foreign matter was observed in the final compost product.
- 17) Digital photographs were taken during this Facility Compliance Inspection.
- 18) No violations were noted during this Facility Compliance Inspection.
