Re: Water Quality Assessment at the Alexander County Landfill (Permit #
02-01).

Dear Mr. Mashburn,

The Solid Waste Section has received a cover letter and map on behalf of the County from Municipal Engineering. The map indicated the proposed locations for four additional monitoring wells for the assessment of the groundwater contaminant migration from the landfill facility. Before approval for the well installations can be granted, the following information is required:

- 1) Justification for the proposed monitoring well locations.
- 2) Projected target depth (include explanation) for each well.
- 3) A site map that includes potentiometric data, the facility's new property lines and the facility permitted boundary is necessary for the evaluation of the new well locations.

Please submit this additional information within 60 days. If you have any questions, please contact me at (919) 733-0692, extension 261.

Sincerely,

Mark Poindexter, Hydrogeologist
Groundwater Compliance Unit
Solid Waste Section
Division of Waste Management
