Re: Ground Water Sampling and Analysis
Alexander County Landfill

Dear Mr. Greer:

Recently Mr. Larry Rose, Hydrologist with the Solid Waste Section, contacted me regarding your ground water samples. It is standard operating procedure for the State to select several counties every year with whom they take ground water samples, and Alexander County has been selected this year. In order to do this, the State must be made aware of the date your sampling contractor plans to take his next ground water samples. The State will then arrange to have their representative on site at the same time. As the sampling contractor pulls a sample, he will take half of each sample and perform his normal tests; and the State representative will take half of each sample and perform their own tests. The State normally analyzes for more constituents than does your contractor. The States does this at no cost to the County.

Please contact me or you may contact Mr. Rose, Solid Waste Section, direct with the date that the sampling will be performed. If you have any questions, please don't hesitate to contact me at 919-772-5393.

Very truly yours,
MUNICIPAL ENGINEERING SERVICES CO., PA
