Re: Approval of the Water Quality Assessment Proposals for the Alexander  
County Landfill (Permit # 02-01).

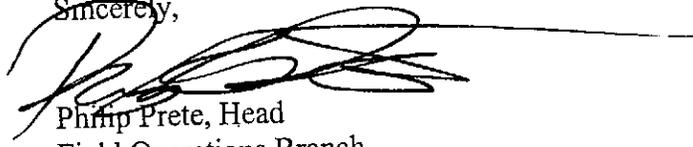

The Phase I Water Quality Assessment proposals submitted on behalf of the  
County by Municipal Engineering, dated April 29, 1999, are approved with the  
following comments.

- 1) Please add to the existing site/potentiometric map the permitted  
boundary of the facility.
- 2) The report shall include justification (geologic and hydrogeologic) for  
the vertical placement of well screens in the proposed wells.

Please implement the proposed field work and submit a report within ninety (90)  
days. Also include any additional proposals for tasks that are necessary to  
complete the plume delineation.

Thank you for your prompt attention to these matters. If you have any  
questions, please contact Mark Poindexter at (919) 733-0692, extension 261.

Sincerely,

Philip Prete, Head  
Field Operations Branch  
Solid Waste Section
