Subject: RE: Air Quality Permit

Hi Kenneth,
I am writing to clarify the understanding of applicability of an air quality permit.
During our phone call you stated that your business was to demolish structures and haul the debris to The appropriate facilities. You stated that you may haul the debris to your own facility in order to sort The debris. You stated that you do not process the debris by any means that would burn or otherwise change the form of the material.
You stated that you do not emit any pollutants; particulate matter, hazardous, toxic or otherwise. Therefore, it does not appear that you would require an air quality permit. You would still be subject to any air quality regulations, such as fugitive dust, odors and open burning. You may require a permit from other agencies including The Division of Waste Management, Division of Land Quality, Division of Water Quality and possibly other state or local agencies.

Subject: Air Quality Permit

Mr. Moser,

Per our conversation, there will be no need for an Air Quality permit in order to operate our facility.

Could you please send us something in writing stating that we will not need an air quality permit to operate this facility?

Thank you,

Kenneth Hardin
