Mr. Edward L. Mann
Dare Co. Public Works
P.O. Box 1000
Manteo, NC 27954

Dear Mr. Mann,

Enclosed herewith are the analytical reports for your C&D landfill facility. There were Chloromethane detections on all samples which we feel are in error. We determined that there was no in-lab contamination, but feel that they may have been contaminated during the field collection process. At no charge to the county, we will re-visit the site and collect additional samples for the volatiles scan (which includes Chloromethane). I have notified the NC Solid Waste Section about this problem and will report the data to both yourself and the SWS when it is available. Please feel free to give me a call if you have any questions.

Best regards,

Steve Jones

Dear Mr. Mann,

Enclosed herewith are the results for volatiles samples that were re-collected on 10/08/09 for your C&D facility. Chloromethane was not detected in any of the samples this time. The NC Solid Waste Section will receive a copy of these results asking them to replace the previous data set that had the contamination problem. . Please feel free to give me a call if you have any questions.

Best regards,

Steve Jones
