SUBJECT: Closure of the Lee County Landfill
Permit #53-01

Dear Mr. Johnson:

The Solid Waste Section has received and reviewed documentation submitted by your consultant on your behalf regarding the subject facility. Upon review of this information, the Section has determined that the water quality monitoring system needs to be upgraded for post-closure monitoring in order to ensure the early detection of any release of hazardous constituents. Some of the existing monitoring wells are greater than 250 feet from the waste boundary or have design or maintainance conditions that make upgrading of the monitoring system necessary.

Within 60 days of receipt of this letter, Lee County, or its consultant, needs to submit to the Solid Waste Section a plan for upgrading the water quality monitoring system at the subject facility.

If there are any questions regarding this letter, please call the Solid Waste Section Hydrogeologist at (919) 733-0692.

Sincerely,

Jim Bateson

Jim Bateson,
