Mr. Allen Gaither
North Carolina Department of Environment and Natural Resources
Solid Waste Section
2090 US 70 Highway
Swannanoa, NC 28778

Dear Mr. Gaither:

The Jackson County Transfer Station permit (50-03T) is currently up for a renewal. I had been under the impression that it did not expire until June 24, 2008 since a modification was done June 24, 2003, but the expiration date did not change with the modification. After discussing this with Mr. Troy Harrison, the original permit expired on February 2, 2007.

Therefore, I would like to request information on the renewal process for immediate rectification of this issue. Apparently, Mr. Jim Patterson was also under the impression that it expired in 2008 since the facility audit in July 2007 did not note any notice of violations. Regardless, Jackson Country would like to complete the renewal process as soon as possible.

An additional topic of interest dealing with permitting concerning Jackson County is that we are planning to construct a new transfer station building adjacent to the existing one on the same property. We are currently working with Municipal Engineering's Wayne Sullivan on this project. Our plans are to have drawings for the new facility in July 2008 and would like to let out bids sometime in late summer. Since the current permit is in need of renewal, I am requesting information to see if the new transfer building should be included in with this permit process or will this be a separate process. Thank you for your consideration on the issues concerning Jackson County.

Sincerely,

Chad S. Parker
