Subject: Application revisions
Attachments: Application Revisions.pdf

Larry,

Attached is the revisions to our application concerning our Operation Plan and our Financial assurance. Also, the plot plans have been revised and the name of our facility added to the applicant and operator certification pages.

I have spoken to Jim Moser concerning the need for an air quality permit and was informed there is no need for that permit in order to operate our facility. Please let me know if there is anything else I can to to help expedite this process.

Thank you,

Kenneth Hardin

Section 3- Operation Plan

14. Construction and demolition debris waste. We plan on accepting block concrete, asphalt, wood, sheetrock, insulation, siding, metal, plastic, cardboard, yard debris, ductwork piping, carpet and other construction debris originating from a construction or demolition site.

15. We estimate $25 per day.

16. Cumberland, Harnett, Hoke, Robeson and Sampson Counties

17. We will dispose of the waste that we collect in each county back to that county's landfill. The recyclable item will be disposed of at the following areas:

    Cardboard, plastic and paper:
    Pratt Recycling
    3680 Owen Drive
    Fayetteville, NC 28306

    Yard Debris:
    Cumberland County Landfill
    771 Wilkes Rd
    Fayetteville, 28306

    Metals:
    Onmisource Southeast
    445 Glidden Dr.
    Fayetteville NC 28303

    Sheet Rock:
    Carolina gypsum
    7323 Old Goldmine Road
    Marshville, NC 28103

18. We have scales installed at our facility. We have a track hoe with a grapple installed and a slow speed shredder. We are in the process of acquiring a trammel machine.

19. We have a fence entrance that has an electric gate. The gate will be controlled by office personnel and we also have cameras monitoring the property. Our road is dirt and gravel which is maintained at all times. We are open 7:30 AM to 5PM Monday through Friday.

20. We have a sign posted on the main gate and will have directional signs to the scales and then the dump area. We will post the proper numbers to call for an emergency along with our permit number.

21. Our employees will be on site at all times during hours of operation to oversee the loading and unloading of the waste.

22. Upon arrival drivers shall check in at the scale office. The trucks will be weighed, then proceed to the unloading are where they will dump the waste then leave the premises.

23. We will have 30 yard containers to be designated for each recyclable produced (plastic, cardboard, paper, metal, brick, concrete and C&D) to go to the landfill. We expect that the recyclable materials will be removed once a week or sooner if the containers are full. We do not see any reason for recyclables to remain on our yard for 1 year.

24. We have a slow speed grinder that we will use to grind all non-recyclable materials to be hauled to the landfill. We will not store materials on our pad. At the end of each day the pad will be swept.

25. We will not be receiving any household waste or any unacceptable waste on our site

26. We will not operate in the rain at this time. We will put a drain in our pad to collect any run-off that may accumulate on the pad.

27. We plan on a sump and slope style pad as to capture any run-off that may have been contaminated by the waste.

28. If storage of waste is required, we will cover it. We will police the area to keep it clean and free of trash.

Section 3- Operation Plan continued

29. Our grinder has a water misting system to control dust. We will police this area as well to insure no litter leaves the property.

30. We will dispose of white goods and tires at the landfill as required. Yard debris will be taken to the Cumberland County Wilkes Road facility.

31. We have fire extinguishers located throughout the facility. If we have a fire, we will call 911 and assist with our fire extinguishers as needed.

32. We will track all incoming waste. The out-going recyclables and waste will be weighed as it leaves the yard. We will keep track of where the waste originates from and dispose of it to the proper facility.

33. If our equipment breaks down, we will not accept C&D waste until the proper repairs are made. If a spill is detected, we will take all necessary measures to clean it up as soon as possible. We are on a dead end road and foresee no traffic problems. We will not operate in extreme weather conditions

Section 5- Financial Assurance

As stated in article 23 in the operations plan, all materials will be removed weekly. We would like to estimate $150.00 per ton to have another contractor remove the material that will be kept on our property should the need arise to have a 3rd party clean up.
