RE: Soil pH of the Fields at SLAS-09-07
Singletary's Septic Tank Service
SR 1195 in Bladen County

Dear Mr. Singletary:

During the application review for permit renewal of Septage Land Application Site, **SLAS-09-07**, the Division of Waste Management discovered an issued with the landowner. The Division has been in the process of closing out this permit since you were not able to get authorization from the landowner to use this site for septage land application.

On May 16, 2012, staff from the Division collected soil samples from the two permitted fields. The Soil Report received from the North Carolina Department of Agriculture and Consumer Services revealed a soil pH of 5.1 for Field 1 and 4.9 for Field 2. NC Septage Management Rule 15A NCAC 13B .0843(e) states "Prior to final closure, the soil pH of the site shall be raised to 6.5, unless the fertility requirements for crops to be grown in the following year dictate less." **Therefore, lime must be added to the fields to raise the pH of the soil. The Soil Report indicates that 1.5 tons/acre of agricultural lime is needed for Field 1 and 1.7 tons/acre is needed for Field 2. You must add the required lime as indicated in the Soil Report and provide documentation to the Division that the fields were limed as recommended. At a minimum, lime receipts can be used to document the lime applications to the disposal fields. Mail this documentation to:**

CONTINUE ON BACK

I have enclosed a copy of the Soil Report and site map for your review. Failure to address the soil pH issue may subject all responsible parties to enforcement actions including penalties, injunction from operation of a solid waste management facility or a solid waste collection service and any such further relief as may be necessary to achieve compliance with the North Carolina Solid Waste Management Act and Rules. Pursuant to N.C.G.S. 130A-22(a) and 15A NCAC 13B .0701-.0707, an administrative penalty of up to $15,000.00 per day may be assessed for each violation of the Solid Waste Laws, Regulations, Conditions of a Permit, or an Order issued under Article 9 of Chapter 130A of the N.C. General Statutes. If you have any questions, please contact me at (919) 707-8283.

Sincerely,

Chester R. Cobb, Soil Scientist
Composting & Land Application Branch
