**RE: Landfill Gas Monitoring Report  
LFG Monitoring – May 2015  
Town of Kernersville Closed Landfill, Permit No. 34-04  
JOYCE Project No. 838.1501.12, Task No. 03**

Dear Ms. Drummond:

Please find the attached Environmental Monitoring Reporting Form (EMRF) and Landfill Gas Monitoring Log for the monthly monitoring event that occurred on May 27, 2015, at the Closed Town of Kernersville Landfill (Permit number 34-04). Methane monitoring for this event was conducted by Joyce Engineering (JOYCE) on behalf of the Town of Kernersville in accordance with the approved *Landfill Gas Monitoring Plan* dated July 17, 2012. Methane was detected in gas monitoring wells GW-1, GW-2R, GP-10, GW-8 above the Lower Explosive Limit (LEL) during this monitoring event.

During this event three probes belonging to the adjacent Waste Management Piedmont landfill GP-9, GP-10, and GP-11 were also monitored for methane gas. Methane was detected in GP-10 above the Lower Explosive Limit (LEL) during this monitoring event

Additional monthly monitoring will provide additional data to demonstrate whether the methane migration is being reduced by the three passive vents installed on the Kernersville Landfill in November 2013. A map has been included with this report to illustrate the proximity of the two landfills and the locations of the gas probes. If you have any further questions, please contact me or Van Burbach at (336) 323-0092. Thank you.

Sincerely,  
**JOYCE ENGINEERING**

**Notice:** This form and any information attached to it are "Public Records" as defined in NC General Statute 132-1. As such, these documents are available for inspection and examination by any person upon request (NC General Statute 132-6).

**Instructions:**

- **Prepare one form for each individually monitored unit.**
- **Please type or print legibly.**
- Attach a notification table with values that attain or exceed NC 2L groundwater standards or NC 2B surface water standards. The notification must include a preliminary analysis of the cause and significance of each value. (e.g. naturally occurring, off-site source, pre-existing condition, etc.).
- Attach a notification table of any groundwater or surface water values that equal or exceed the reporting limits.
- Attach a notification table of any methane gas values that attain or exceed explosive gas levels. This includes any structures on or nearby the facility (NCAC 13B .1629 (4)(a)(i)).
- Send the original signed and sealed form, any tables, and Electronic Data Deliverable to: Compliance Unit, NCDENR-DWM, Solid Waste Section, 1646 Mail Service Center, Raleigh, NC 27699-1646.

**Notification attached?**

- No. No groundwater or surface water standards were exceeded.  
 Yes, a notification of values exceeding a groundwater or surface water standard is attached. It includes a list of groundwater and surface water monitoring points, dates, analytical values, NC 2L groundwater standard, NC 2B surface water standard or NC Solid Waste GWPS and preliminary analysis of the cause and significance of any concentration.  
 Yes, a notification of values exceeding an explosive methane gas limit is attached. It includes the methane monitoring points, dates, sample values and explosive methane gas limits.

**Certification**

To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards. I am aware that there are significant penalties for making any false statement, representation, or certification including the possibility of a fine and imprisonment.
