**Subject:** SWS Permit Application Review (34-19 TP) - Operations Plan (July 2014) for Lowder R&D, Inc  
**Date:** Monday, November 24, 2014 4:00:00 PM

---

Mr. Lowder,

As discussed in our phone conversation, we've completed the technical review of your operations plan for your permit renewal.

The application was considered complete with all required information submitted. Based on the technical review, we're requesting a few minor revisions to the operation plan as follows:

Section A (Intro)

- Correct parcel acreage from 13 to 10.8 acres (as listed on county records)

Section B (Materials Received)

- Include fill dirt in the materials received. Note whether fill dirt stored separately from other materials.

Section C (Handling/Storage, Item #5)

- Daily intake listed as estimated 25 tons/day in this section, but listed as 15 tons/day in Section I. Revise to be consistent.

Section D (Siting Criteria)

- Note that facility maintains measures (berms, sediment basins, etc) for managing stormwater and erosion control from site

Section E (Processing)

- Add note about how temperatures of storage piles are measured and documented

Section I Daily Intake

- See note above for section C

Please provide a revised Operations Plan to me (you can send a pdf via email) as soon as you can. The final permit will be issued pending completion of the compliance history review if there are no complications. Please feel free to call if you have any questions concerning the operations plan. Thank you.
