Mr. Rightmyer-

I have some preliminary comments regarding the December 2014 permit renewal application submitted for the Roanoke Valley LCID:

There were no revisions (updates) contained in the 2014 Operations Plan submitted with the permit renewal application. The NC SWS requires an updated Operations Plan detailing activities that have occurred in the 5 years since the date of the original Operations Plan and issuance of the previous (2009) permit. The original Operations Plan was dated July 2007 with September 9, 2009 revisions.

Include the following information in the updated Operations Plan:

Describe daily activities occurring at the LCID landfill.

Include average daily intake (cubic yards). Include total intake in cubic yards since 2009.

How much acreage has been filled since 2009? Has the waste been placed in Phase I? Is Phase I now full and closed?

How much capacity has been used and how much remains?

The engineered drawings are identical to the ones submitted in 2007 and which actually have a 2005 date on them. The NC SWS requires an updated engineered drawing illustrating the location and elevation of waste placed in the LCID since the last permit was issued. The drawing needs to be signed and sealed by a NC Professional Engineer.

If you have any questions, please feel free to contact me.

Thank you,

Mr. Rightmeyer-

I have received your application for a permit renewal and will begin the application review process in the next week. After I start to process the application, we will invoice you and send out a Compliance History Review survey. After I complete my initial technical review of the application, I will send a letter requesting any additional information if necessary.

Thank you,

Christine Ritter (Christine.Ritter@ncdenr.gov)
