ADDITIONAL COMMENTS:

1. This was not a comprehensive inspection due to the gate being locked and the side fences being barb wire.
2. **Insure that solid waste shall be restricted to the smallest area feasible and compacted as densely as practical into cells.**
3. The facility is not open to the public. The gate was locked. Very Good.
4. The sign at the gate has an emergency contact number posted and is easily seen.
5. **The side slopes shall not exceed three to one (3:1). This has been commented on in past inspections.**
6. **Items 2 and 5 must be completed within three weeks of receipt of this report. Call me when work is completed for a reinspection.**

Please contact me if you have any questions or concerns regarding this inspection report.
