STATUS OF PERMIT:

Expired; Permit to Operate issued 9 December 2005. A complete Compost Facility Permit review request including updated Facility, operations, and waste screening plans has been submitted. This Facility Permit has been reviewed by the Solid Waste Section Compost and Land Application Branch Head and is currently pending approval.

PURPOSE OF SITE VISIT:

Partial Facility Compliance Inspection without records review

STATUS OF PAST NOTED VIOLATIONS:

None applicable

OBSERVED VIOLATIONS:

No violations were observed during this Facility Compliance Inspection; please see ADDITIONAL COMMENTS section below.

ADDITIONAL COMMENTS:

- 1) This Facility is a Large Type IV Composting Facility.
- 2) This Facility is permitted to receive for composting, chicken litter and mortalities generated on site at the egg production Facility.
- 3) This site is secured by a locked gate at the Facility entrance.
- 4) All composting activities including temperature monitoring and windrow turning/aeration events are recorded in a log. This log is maintained in the Facility Supervisor's office.
- 5) All storage and composting activities at this site are maintained inside the compost buildings on a concrete pad.
- 6) The waste types at the Facility were reviewed and no unpermitted wastes were noted during this Facility Compliance Inspection.

- 7) The compost windrows are monitored for temperature and turned mechanically as required.
- 8) All composting activities including temperature monitoring and windrow turning actions are recorded in a log which is maintained in the Facility supervisor's office.
- 9) Processed compost is meeting all temperature and time requirements before being distributed to the public.
- 10) Composting operations were underway during this Facility Compliance Inspection.

- 11) All finished compost is stored inside on a concrete pad.

- 12) All finished compost is stored in a separate area from all active composting operations to prevent contamination by unprocessed wastes.
- 13) Finished compost is stored on-site until removed from the Facility for agricultural land application.
- 14) Mortalities are layered with straw and chicken litter in a bin system for composting before being incorporated into the litter composting windrows.
