Re: *Western Carolina University's Kudzu Plan*
Closed and Unlined Western Carolina University MSW Landfill
Jackson County
Solid Waste Permit Number 50-01
DIN 24912

Dear Mr. Turk:

The Solid Waste Section has completed a review of the *Plan for Herbicide Application to Control Kudzu at the Western Carolina Closed MSW Landfill* (DIN 24911) submitted on August 25, 2015 for the Closed and Unlined Western Carolina University MSW Landfill, Solid Waste Permit Number 50-01.

Western Carolina University is requesting to utilize a herbicide, Streamline by Dupont, to be sprayed by a licensed herbicide sprayer, on the invasive kudzu located on the landfill in an area approximately three acres. The first application is scheduled to be applied immediately upon approval and hydroseeding will be conducted in the Spring of 2016. Additional treatments of the herbicide may be required.

As a result, the *Plan for Herbicide Application to Control Kudzu at the Western Carolina Closed MSW Landfill* is approved as described. If you have any questions or concerns regarding this letter, please feel free to contact me at 828.296.4706 or by email at jaclynne.drummond@ncdenr.gov. Thank you for your continued cooperation with this matter.

Sincerely,

Jaclynne Drummond
Compliance Hydrogeologist
