Re: Implementation of Groundwater Assessment and Corrective Action Requirements (Permit #50-02).

Dear Mr. Cabe,

Jackson County has fulfilled the municipal solid waste landfill requirements of North Carolina Solid Waste Management Rules, 15A N.C.A.C. 13B, .1633 (Detection Monitoring Program) and .1634 (Assessment Monitoring Program), parts (a) and (b). Based on groundwater monitoring data from the facility the County is now required to proceed with the remaining requirements of .1634, .1635 (Assessment of Corrective Measures), .1636 (Selection of a Remedy), and .1637 (Implementation of the Corrective Action Program). These requirements are intended to be self-implementing. Please proceed to implement these requirements within sixty (60) days.

Groundwater protection standards have been established for most Appendix II constituents detected in assessment monitoring. In general, the groundwater protection standards conform to N.C. 2L Groundwater Standards or recommended health-based concentrations determined by the Division of Epidemiology. If needed, these groundwater protection standards are available upon request to the Division of Waste Management, Solid Waste Section.

If you have any questions, please contact Mark Poindexter at (919) 733-0692, extension 261.

Sincerely,

Dexter Matthews
 Dexter Matthews, Section Chief
 Solid Waste Section
 Division of Waste Management
