Mr. Jason M. Watkins
Field Operations Branch Head
Solid Waste Section
Division of Waste Management
North Carolina Department of Environment
and Natural Resources
585 Waughtown Street
Winston-Salem, NC 27107

Dear Mr. Watkins:

Subject: Notice of Violation
North Mecklenburg C&D Landfill – Closed Phase I
Mecklenburg County
Solid Waste Permit Number 60-13
CEC Project 111-370.001

On behalf of Greenway Waste Solutions, LLC. (GWS) Civil & Environmental Consultants, Inc. (CEC) is providing this response to the abovementioned Notice of Violation dated September 26, 2014. Specifically, the Solid Waste Section (Section) has required the facility to:

Re-establish the 50-foot buffer by whatever means necessary to comply with the Solid Waste Rules. A response must be provided to the Section within 30 days of receipt of this report detailing the specific plan of action to achieve compliance, including any contingencies and timeframes for completion.

The Revised Edge of Waste Investigation Report (Report) dated August 26, 2014 included field confirmation of the edge of waste limits at the closed facility utilizing the 50-foot buffer required in .0503(2)(f). Based upon the field confirmation and acceptance by the Section, waste is located within the 50-foot buffer along the eastern property boundary of the closed facility, in the area between Test Pits 11 and 13 as noted in the Report. Consistent with the Report, this area is identified in the attached Figure 1.

Also depicted in Figure 1 is the Area of Interest, which identifies those Tax Parcels that are affected by the reduced buffer. Those Parcels include Parcel ID # 01918162 (Hammill) and Parcel ID # 01918135 (Wright). GWS's intention is to acquire, at a minimum, a portion of these properties to achieve compliance.

GWS and the affected property owners, Hammill and Wright, have entered into discussions concerning this acquisition. It is anticipated that these discussions will come to fruition by

Mr. Jason M. Watkins - NCDENR
CEC Project 111-370.0001

January 15, 2015. By that time, it is expected that, at minimum, a Real Estate Option will be agreed upon for the purchase of the parcels and/or a portion of the parcels that will satisfy the required 50-foot buffer.

As a contingency, if an agreement cannot be reached within the time period discussed above, a Waste Relocation Plan will be developed. This Plan will include the development of pertinent permit applications, a grading plan, a health and safety plan, and a schedule to complete the required work to meet the 50-foot regulatory buffer.

Should you have any questions or need any additional information, please feel free to contact me at 704-773-6465 or by email at sbrown@cecinc.com or Mike Griffin at 704-895-4506 or by email at mike@griffinbrothers.com.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.
