SUBJECT: Notice of Violation issued to Re... Technology on April 4, 2002		
SUMMARY OF COMMUNICATION Jim Barber, Ellen Lorscheider and I visited the site to assist in locating the concrete pipe and determining the depth to ground water under the ash fill area. Waldrop indicated that there were some differences in the elevations drawing submitted recently and the final contours of the site. We told him that these slight deviations would not be a problem and that just include the changes in the as built drawings. Barber told Waldrop that the new drainage pipe that was to be installed to divert surface water from the ash must be installed in ash, or to be back filled with ash.
