Subject: Sutton On-Site Proposed Landfill - Duke Submittal Dated May 7, 2015

Ed – Duke Energy submitted to DENR Solid Waste under cover letter dated May 7, 2015 the Site Suitability report for a proposed on-site landfill at our Sutton Energy Complex. Duke Energy's intent of this submittal was to provide DENR Solid Waste information to begin their review, especially for the hydrogeologic portion of the review. Duke Energy understands this submittal did not include all necessary information (detailed engineering design required for permit to construct much less all necessary information required in the site application) to begin DENR Solid Waste's time clock for review of completeness/approval. As the site application and detailed engineering design is completed, Duke Energy will make an additional submittal to DENR Solid Waste to begin the official review period. If you have any questions, please give me a call. thanks

John R. Toepfer, P.E.
