Mr. Frost:

The Charlotte Douglas International Airport (CDIA) would like to request an extension of the DEMO compost permit pending a MSW permit. It is the desire of CDIA to receive a ten year MSW transfer station permit. We are at this time aggressively moving forward with the application using all available resources and plan to submit it with all supporting documentation. We would like to request NCDENR to expedite the process in order for CDIA to receive their permit prior to October 18, 2014. CDIA understands that it will be invoiced for this permit upon receipt of this request. Thank you for your consideration in this matter.

Thank you,

Bob Lucas
Charlotte Douglas International Airport
Housekeeping Services Manager
