- 7) Proper signage is posted at the Facility entrance stating the Facility emergency contact number and types of waste accepted.
- 8) The access road to the Facility is of all-weather construction and is being managed properly at this time.
- 9) The perimeter of the landfill has been staked to identify the landfill footprint.
- 10) Soil has been stockpiled in an area adjacent to the active working area for use in cover and grading activities.

- 11) The waste type being disposed is LCID waste only; no unacceptable waste streams were noted during this Facility Compliance Inspection.

- 12) The active working face needs to be better defined, more efficiently compacted, and maintained in a smaller area. *Please compact all waste as densely as practical into cells and maintain the working face in as compact an area as is feasible.
- 13) *Please ensure that all waste is covered monthly or when the active working faces reaches 1 acre in size, whichever occurs first.
- 14) The outside slopes appear to have a slope greater than 3:1 and are lacking sufficient cover. *Please compact, cover, and grade all outside slopes at a slope not greater than 3:1. After grading, all slopes should be seeded and mulched to
