128 Taylorville Mfg. Road  
 Taylorville, North Carolina 28681

**PARTICIPANTS:**

Charles Gerstell, NCDENR-Solid Waste Section

**STATUS OF PERMIT:**

A Permit to Operate a Septage Land Application Site was issued to Taylorville Precast Molds, Inc. on December 6, 2011. This permit will expire on December 6, 2016.

**PURPOSE OF SITE VISIT:**

Routine Inspection

**STATUS OF PAST NOTED VIOLATIONS:**

N/A

**OBSERVED VIOLATIONS**

None

The item(s) listed above were observed by Section staff and require action on behalf of the facility in order to come into or maintain compliance with the Statutes, Rules, and/or other regulatory requirements applicable to this facility. Be advised that pursuant to N.C.G.S. 130A-22, an administrative penalty of up to \$15,000 per day may be assessed for each violation of the Solid Waste Laws, Regulations, Conditions of a Permit, or Order under Article 9 of Chapter 130A of the N.C. General Statutes. Further, the facility and/or all responsible parties may also be subject to enforcement actions including penalties, injunction from operation of a solid waste management facility or a solid waste collection service and any such further relief as may be necessary to achieve compliance with the North Carolina Solid Waste Management Act and Rules.

**ADDITIONAL COMMENTS**

1. This inspection was performed to collect soil samples from the septage land application field. A check was received for payment to the NCDA&CS.
2. Proper signage was provided at the entrance to the facility. A second sign was provided at the southeast corner of the property adjacent to Henry Road.
3. The access road leading to the site was of all-weather construction. Some erosion of the road was observed, but damage did not prevent access to the site.
4. The septage land application area was marked with PVC pipes located at each corner of the field.
5. **Permit Condition #2 states in part:** *“The site shall be operated and maintained in accordance with the nutrient management plan submitted by David Mecimore and approved by the Division.”* The approved crop for this site is fescue as detailed in the approved Nutrient Management Plan for the site.
  - A broad leaf weed (possibly Buckhorn Plantain) has been established on the northern portion of the application area replacing much of the Fescue.
  - Please take immediate steps to control weeds and reestablish Fescue on the entire field. You may also want to contact your local Cooperative Extension Service for information on controlling invasive species.
6. No evidence of runoff or application outside of the approved area was observed.
7. No evidence of rutting was observed.
8. No objectionable odors were observed.
9. It appeared all required setbacks were being maintained.

Please contact me if you have any questions or concerns regarding this inspection report.
