**ADDITIONAL COMMENTS**

1. The site is a permitted Septage Land Application Site consisting of 2 fields totaling approximately 10.8 acres (Field B- 5.7 acres, Field C- 5.1 acres).
2. The site is permitted for land application of domestic septage, portable toilet waste and grease septage.
3. Total maximum application rate is 50,000 gallons per acre per year, and total maximum application rate for the site is 540,000 gallons per year. Review of pumping and land application records were conducted on 11/12/14.
4. The site has an approved above ground septage detention system (30,000 gallon steel tank), newly installed and inspected in conjunction with the septage land application site inspection.
5. Appropriate signage in place as per requirements.
6. The site has accessible, recently graded and graveled all-weather roads.
7. Setbacks from land application areas to property lines (50 feet) and wells/residences/businesses (500 feet) are maintained.
8. Disposal area boundaries clearly delineated with permanent markers.
9. Access to the site is controlled by a locked gate.
10. Approved Nutrient Management Plan requires fescue and/or orchard grass as vegetative cover.
11. Good vegetative cover over both fields, site has been minimally utilized during the past year.
12. The approved Nutrient Management Plan requires the fields to be rotationally grazed or harvested. Hay has recently been harvested on Field B. Field C has been cattle grazed during the summer.
13. Cattle have been rotated to Field B for grazing and the field is closed for septage application. Field C is being utilized for septage land application.
14. Soils samples were taken on Field B (Sample #300071) and Field C (Sample #30072). Received \$50.00 check (# 6116) for soil sample analysis.
