RE: Tank Trust Fund Reimbursement Package Burlington Industries Tucker Street Extension Facility

Dear Ms Rintoul:

Please find enclosed an analytical report and chain of custody for the three soil samples in question. These samples were collected for analysis immediately subsequent to the removal of the USTs at the Burlington Industries Site and prior to the excavation of additional contaminated soil. Because the locations that these samples were collected from were later excavated, these analytical results were not included in the tank closure report submitted for this site. Please note that sample D-1-B confirms a release at this site.

Thank you for your assistance in this matter. Please contact me if I can answer any additional questions.

Sincerely,  
ENSCI Corporation

Chris Boggs  
Environmental Scientist
