RE: Additional Information Needed for No Further Action Status at:
American Drew Plant 14
Highway 268 East, North Wilkesboro
Wilkes County, N.C.
Incident No.: 9916

Dear Mr. Greer:

The Winston-Salem regional office has reviewed the file to see if it could qualify for a no further action letter. The last soil samples collected showed a TPH value of 56.5 parts per million at 10 feet. The water table was reported to be at 14.7 feet. These conditions unfortunately make the previously submitted site sensitivity evaluation, and thus the higher cleanup level, inapplicable. I suggest that a GeoProbe boring be placed in the same area of previous sample AD14-01 in order to collect a soil sample at 10-11 feet and a grab groundwater sample. Analyze all samples using the appropriate risk-based methods. This will allow us to use current data and risk-based criteria to write the appropriate type of no further action letter.

If you have any questions, please contact **Stephen Williams** at the letterhead address and/or at (336) 771-4600.

Sincerely,

Sabra M. Elder
Hydrogeological Technician II
