Re: B&C Grocery – Sampling Trip Summary
NONCD0002837

-
- On October 27, 2009, Larry Rose and I visited the site to sample water supply wells in the area. We had obtained permission to sample the wells at 829 Whittemore Road and 830 Sunset Drive prior to our visit. Several letters requesting permission to sample wells in the area were sent out, but those were the only two to respond in the positive. The other addresses either did not respond or they declined our request. We sampled the two wells and knocked on other doors while in the area. The residences either did not come to the door or they declined my request to sample their well.
 - While we were in the area we observed that site was in a low area with a perennial stream running through the property. The wells that have been previously identified within the 1500' radius of the site by Paragon Environmental Consultants, Inc. appear to be upgradient of the site.
 - The samples from the two wells that were collected were sent to Shealy Labs for testing on October 27, 2009.
