RE: Water Supply Well Sampling Results
830 Sunset Drive
Graham, NC 27253

Dear Mr. Robertson:

On October 27, 2009, I collected a groundwater sample from your water supply well located at the above referenced address. The sample was submitted for laboratory analyses for Volatile Organic Compounds (VOCs). There were no VOCs detected in your water supply well sample. As such, the use of your well water is considered safe and should not result in any adverse health effects.

If you have any questions or if I can be of any further assistance, please contact me at (919) 508-8573.

Sincerely,

Dwayne Peterson

RE: Water Supply Well Sampling Results
829 Whittemore Road
Graham, NC 27253

Dear Mrs. White:

Please find attached the Sample Analytical Results for a water sample collected from your well located at the address referenced above, on October 27, 2009. The sample was submitted for laboratory analyses for chemicals listed on the attached sheets. Volatile Organic Compounds (VOCs) were detected in the water sample as shown on the attached sheets.

Because VOCs were detected in the water sample, a Health Risk Evaluation (HRE) of the water supply was performed by our toxicologist. The HRE, which is enclosed, compares the concentration of detected contaminants to acceptable concentrations and provides a recommendation for safe use of the water.

If you have any questions regarding the Health Risk Evaluation, please contact Hanna Assefa at (919) 508-8445 or me at (919) 508-8573.

Sincerely,

Dwayne Peterson
