Please find the attached NORR. There are multiple community wells that serve public water systems in the vicinity of this facility, one is located approximately 1200 feet to the south on Shiloh Road. We will need the a copy of the facility's SW3P in addition to the information below. Upon receipt a complete questionnaire, I will attempt to screen the site for REC eligibility or ask for additional information. If you have questions please contact me.

George,

Yes, the facility is still open. They do not perform any galvanizing at this facility and yes they complete metal weaving. The building used for galvanizing is vacant and is going to be demolished in the future.

The facility is still open, right? I understood they are just stopped the galvanizing and continued the metal weaving, and I need to confirm that. Thanks-G

I'm also going to need all of your field sampling forms, in particular for the surface water and storm water samples collected. I did not see data for turbidity or conductivity or any other field parameters during my limited and cursory review of data.

If you have your client's contact information (Name and Email address) that would be helpful as well. I will be able to get a NORR out faster.

Mr. Burns,

I apologize for the delay in screening the information provided by Robin Proctor of the Hazardous Waste Section (January 19, 2012) for the Merchant Metals (EPA ID NCD980710602) facility in Statesville, Iredell County, North Carolina. As Bruce indicated, you may be required to compile the information needed to complete a Site Cleanup Questionnaire. A copy of the questionnaire can be found at the link that Bruce provided below.

In the interim, you can accelerate my review and screening of data by providing me original copies of the Terracon Assessments referenced in your reporting including (without limitation) the January 2010 Limited Site Investigation. If there have been additional assessment activities at the facility, I will likely need this information as well.

Again, I appreciate your patience. If you have questions or need additional information, please contact me at 704-663-1699. Thanks—George

Mr. Burns,  
The site was very recently forwarded to the Inactive Hazardous Sites Branch by the HWS. I assigned the site to one of my staff, Mr. George Adams, for processing into our inventory on 1/25/12. He most likely has not had the opportunity to process it into the inventory yet and send out a new site Notice of Regulatory Responsibilities (NORR) requesting a Site Cleanup Questionnaire. If you would like to go ahead and submit a Site Cleanup Questionnaire in advance of your client receiving the NORR, you may certainly do so. The Site Cleanup Questionnaire, as well as other information about our program, can be found at: <http://portal.ncdenr.org/web/wm/sf/ihshome>.

I've copied George on this email. Thank you for your inquiry.  
Bruce

Bruce,

Robin Proctor of HWS told me that she forwarded the file for the Merchants Metals facility in Statesville to you (HWS NCD 980 710 602). Merchants Metals is very interested in moving the project forward. Can you please let me know if you received the file and, if so, can you provide me with the status (request for Site Cleanup Questionnaire).

Respectfully,

Mike Burns

Mr. Burns,

On behalf of your client, thank you for submitting the site cleanup questionnaire for Merchant Metals, Inc. (NONCD0002892) in Statesville, Iredell County, North Carolina. In order for me to evaluate REC eligibility, I need you to provide previously requested data including (without limitation), field sampling forms for the surface water and storm water samples, all environmental assessments and reports including copies of the original reports from Terracon, and the facility's storm water plan (SW3P). Please indicate if you are unable to provide this information. The IHSB assigned ID # for this Site is NONCD0002892.

We appreciate your efforts to submit data electronically. Please apply OCR (Optical Characteristic Recognition) to all PDFs. Further information regarding Electronic Document Submittal can be found at the link below. If you have questions or need additional information, please contact me--George
