Dear Mr. Salley:

In response to your letter of July 31, 1990, please see the enclosed copies. Our tank was removed in October of 1989 by Beck's Petroleum in Greensboro. The soil samples that were sent to Guilford Labs were a composite of three (3) different locations in the excavation. I have also included a map of the location of the tank.

I hope this will enable you to complete your report. If you need any further information, please let me know.

Thank you,

Joey C. Robbins
Operations Manager
