Subject: Tank Closure
New Home Building Supply
1715 Spring Garden Street
Greensboro, NC

Dear Mr. Salley:

Our subject customer has asked me to contact your office and request an explanation for your Site Sensitivity Evaluation request dated May 16, 1990.

Per our records, the soil sample results were well within the 100 ppm which we were allowed as acceptable in 1989.

We certainly wish to comply with all state requirements, and we feel that we have done so regarding this location. Please advise.

Sincerely yours,

William V. Hill
Vice President
