UST Closure Report**

Dear Mr. Boyer:

On June 23, 1998, the Division of Water Quality (DWQ) Winston-Salem Regional Office received an Underground Storage Tank (UST) Closure Report for the above-referenced site. A review of the report shows that soil contamination does not exceed the residential or soil-to-groundwater maximum soil contaminant concentrations established in 15A NCAC 2L .0115(m), whichever are lower. Based on information provided to date, the DWQ classifies the risk posed by the discharge or release as low risk and determines that no further action is required for this incident. This determination shall apply unless the DWQ later determines that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment.

Pursuant to 15A NCAC 2L .0115(e), you have a continuing obligation to notify the DWQ of any changes that you know of or should know of, that might affect the level of risk assigned to the discharge or release.

Should you have any questions, please contact Sharon K. Cihak at (336) 373-3771.

Sincerely,

Sherri V. Knight
