Greensboro, Guilford County
Incident No. 19733
Soil Contamination Report

Dear Mr. Lewis:

On April 23, 1999, the Division of Waste Management (DWM) Winston-Salem Regional Office received a Soil Contamination Report for the above-referenced site. A review of the report shows that remaining unsaturated soil in the sidewalls and at the base of the UST system excavation does not contain contaminant levels which exceed either the residential or soil-to-groundwater maximum soil contaminant concentrations established in 15A NCAC 2L .0115(m), whichever are lower. Based on information provided to date, the DWM classifies the risk posed by the discharge or release as low risk and determines that no further action is required for this incident. This determination shall apply unless the DWM later determines that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment.

Pursuant to 15A NCAC 2L .0115(e), you have a continuing obligation to notify the DWM of any changes that you know of or should know of, that might affect the level of risk assigned to the discharge or release.

Should you have any questions, please contact Sharon K. Cihak at (336) 373-3771.

Sincerely,

Cindy H. Rintoul
Regional Supervisor
