RC&A Project #92271

Dear Mr. Williams:

This correspondence is a written follow-up to our 12/2/92 telephone conversation concerning the above referenced facility. A suspected petroleum release was identified at this site based on elevated readings from soils which were screened with an organic vapor analyzer (OVA) during installation of site monitoring wells.

If you have any questions or require additional information, please contact me at (919) 452-5861.

Sincerely,

James L. Cornette
